# HEAVY DUTY ONE TIME FOG CLEANER for drains

ecobug® Fat Buster breakdown FOG's in minutes and is 100% irreversible

A granular mixture of free enzymes and bacteria only become active when diluted in a bucket of teped water.

Poured into the affected drain area, they start to breakdown fat and grease in minutes.

The special ecobug bacteria produce more enzymes that convert fats oil and grease into sugars and peptides, these by products are absorbed by the bacteria and they multiply. The cycle continues as long as there is waste (FOG's) present or they are killed of by excessive use of cleaning chemicals.

The ecobug®bacteria are produced by deep fermentation to ensure fatbuster is made to the highest quality & is completely pathogen free

# ecobug® FAT BUSTER - ORGANIC MATTER DEGRADATION

ecobug® Fat Buster - is granular in format and is packaged in 1kg bags as displayed has been researched and manufactured to the highest performance standards, to stabilize bad bacteria breakdown organic material, clear blockages and prevent foul smells
